

Microcom 360C Laser Ticket Printer

High quality, color ticket printer

**Fast, high quality, on demand tickets
brought to you in full color by the Model 360C.**

Full Color, High Quality Printing

The Model 360C is the first Microcom printer capable of CMY color printing. Housed in a compact footprint, the printer uses standard (non-thermal) media to create high definition, full color images on demand. The fast 6" per second print speed lets users print a batch of premium color tickets quickly. The 360C has easily replaceable parts and affordable toner cartridges to keep the printer in top condition for many years after purchase.

Impress Guests, Save Money

Avoid steep set-up/ press fees for small or top tier events and design your own ticket layout that is sure to impress guests at your next VIP event or membership drive. Utilizing a Windows driver makes the 360C compatible with many online ticket creation software packages. "On demand" printing means avoiding unsold tickets by printing only what you need.

Application Overview:

- Event Ticketing
- Fundraising Events
- VIP Ticketing
- Event Wristbands
- Membership Passes
- Retail Vouchers
- Promotions
- Coupons
