Microcom Corporation Announces 424 Promotional Printer

LEWIS CENTER, OH - March 17, 2010 - Microcom Corporation, a leading global provider of thermal printers, is pleased to announce the development of the 424 promotional printer. The printer prints casino cash out tickets. Its flexibility allows tickets to be issued at the hotel desk, cashier's desk and other transaction points. It can also print promotional coupons at other venues such as gas stations, concierge desk, hotel rooms and gift shops. It offers a high capacity ticket tray, which holds up to 1000 tickets and a lockable cover option. It also supports industry standard protocols such as IGT. High-speed printing, up to 8 inches per second, prevents wasted time when busloads of customers arrive. Its heavy-duty construction will survive in the most demanding applications.

About Microcom Corporation

Microcom Corporation (www.microcomcorp.com) is a privately held leading manufacturer of specialty-use thermal label and ticket printers employed throughout the world. Microcom delivers innovative business management solutions for the transportation, healthcare, mail sorting, and specialty thermal printing industries.
