Microcom Corporation Offers Durable, High Reliability Ticket Printer at Receipt Printer Price

LEWIS CENTER, OH – April 1, 2010 - Microcom Corporation, a leading global provider of thermal printers, offers the 324M printer for kiosk type applications. The 324M, the smaller sibling of the 424M printer, contains rigid steel construction and reliable mechanics. Full and partial cut cutters, 203 or 300 dpi resolution and the ability to print on 2 to 11 mil thick stock all add up to unmatched performance.

“Microcom Corporation’s Model 324M is designed to be the most dependable printer in its class. Why compromise the reliability of your kiosk by using a receipt type of printer when you can use a rugged industrial quality printer for about the same cost? It is durable, dependable, and best of all, affordable,” said Bob Young, National Account Manager for Microcom Corporation.
