Microcom Corporation Printer Selected for Major East Coast Turnpike Traffic Management System

LEWIS CENTER, OH – June 1, 2010 - Microcom Corporation, a leading global provider of thermal printers, was selected for Major East Coast Turnpike Traffic Management System.

“Our Model 324M will be used in a state-of-the-art traffic management and fare collection system. The printer is part of a sophisticated system using automatic coin machines, gates, lane controllers and toll terminals. The 324M was selected because of our customers satisfaction with one of our other kiosk style print mechanisms used in a similar application,” said Bob Young, National Account Manager for Microcom Corporation.

About Microcom Corporation

Microcom Corporation (www.microcomcorp.com) is a privately held leading manufacturer of specialty-use thermal label and ticket printers employed throughout the world. Microcom delivers innovative business management solutions for the transportation, healthcare, mail sorting, and specialty thermal printing industries.
