

# Press Release

## **Microcom Corporation Ticket Printers Offer Superior Alternative for Event, Movie and Wristband Ticketing Solutions**

**LEWIS CENTER, OH – November 12, 2010** - Microcom Corporation, a leading global provider of thermal printers, is proud to announce the release of a full line of ticketing printers.

The model 428T is a tabletop printer with internal ticket storage. The 428TC is the compact version of the 428T without internal storage. The 428TM is a mechanism version for kiosk and counter mount ticketing applications that do not require a full external case. All of these products are cost effective alternatives to industry incumbents. They offer features such as cutters, supply holders, and contain an industry standard cash drawer interface. They communicate via USB, Ethernet, serial RS-232 and even parallel using a Windows driver or the industry standard ticket language. The housings are all heavy duty steel for harsh environments and contain a high-lift head mechanism for easy cleaning as well as a tool-less print head replacement feature, which makes support effortless.

These products are available for immediate shipment. Visit [www.microcomcorp.com](http://www.microcomcorp.com) for additional information and complete specifications.
