## Microcom Corporation to Supply Print Engines to Large Medical Automation Systems Provider

**LEWIS CENTER, OH - August 24, 2009** - Microcom Corporation, a leading global provider of thermal printers has been chosen to provide print engines for a large medical automation systems provider.

Dave Dezse, V/P of Engineering at Microcom Corporation said, “The engines will be used in conjunction with the customer’s mechanical design which allows the printer to be used in multiple products sold to the pharmaceutical industry. Microcom’s contract manufacturing division was also selected to produce the complete system.” When asked why buy Microcom, the customer replied, “[Microcom was] the only company that could provide us with both the engine and the manufacturing capability to meet our needs”. Dezse added, “Their previous supplier continuously changed the printer design and firmware which negatively impacted the customers frozen design and manufacturing process.” The customer said “Microcom Corporation allows me to control my own destiny, thereby making our business more profitable.”

### **About Microcom Corporation**
