Unimark Introduces New Printer for Galileo-Member Agencies

ATB printer for travel agencies to replace the aging ADP2800 and ADP3100

Lenexa, Kan.—Unimark Products, a leading manufacturer of printers for the travel industry, announced today the immediate availability of an automated ticketing and boarding (ATB) printers for Galileo's Apollo reservation software customers.

The ADP4000 Sprite is fast, quiet and can print about 600 coupons per day. It offers state-of-the-art ATB printing capabilities for \$1,845.

Unimark Products manufactures the Sprite ADP4000 printer and plans to sell it directly to Galileo's travel agencies. This printer replaces the aging ADP2800 and ADP3100 printers.

"We looked at lots of printers and printer manufacturers and are happy with the performance, cost, and ease of use of the Sprite printer," said Bob Duft, Logistics Manager in the Travel Distribution Services Division. "We've already certified the printer for use with the Apollo system and are confident that it will meet current and future needs of our customers."

For more information about the printer, or to place your order, you can call Unimark Products at (800) 255-6356. You can also send them an email at sales@unimark.com or log on to their website at www.unimark.com/galileo.
