Microcom 315M
Thermal Kiosk Printer
High-speed kiosk printer designed for receipt style continuous roll media

Cost-effective receipt printing for the self-service world.

Adding to Microcom's full line of kiosk printers is the compact model 315M. Easy to maintain and easy to integrate, the 315M provides a full-featured and reliable receipt printer at an entry level price.

Key Features include:

-Long life print head

-USB connectivity

-Industrial strength cutter

-Presenter/retractor

-Automatic paper loading

-6" O.D. roll capacity

-6" per second print speed

Microcom Model 315M

The model 315M is the newest offering in Microcom's line of thermal kiosk printers. This product caters to the most common receipt printing applications for everything between 48 mm and 82.5 mm paper widths. Compact size, ease-of-use, and reliability makes the 315M an easy choice for unattended kiosks.

Out of the box, the 315M offers everything you need to be successful in a receipt printing application. It is equipped with multiple sensors to provide feedback for different paper and error conditions. A standard presenter/retractor feature extends printer life by limiting end-user interaction with the printer until the receipt is fully printed and cut. An optional paper holder with low stock sensor is also available to minimize additional design efforts.

Contact the Microcom sales team to learn more about integrating a 315M into your next kiosk receipt application.

Application Overview:

- Self-Service Kiosk
- Gaming
- Healthcare
- Parking
- Receipt
- Food Service
- Transportation
- Retail
