- CLICK "PRINT TEST PAGE"

2B BLUETOOTH

INSTALL BLUETOOTH DONGLE IN HOST USB PORT

BLUETOOTH SETUP:

-From the home screen, select CONFIG MENU and then OPTIONAL PORTS. Make sure Bluetooth is selected and tap Save. Reboot the printer if prompted.

AFTER DOWNLOADING WINDOWS DRIVER (SEE 3A):

-Pair your printer to the PC via Bluetooth.

-Go to "Control Panel" then "Devices and Printers".

-Right-click your Bluetooth printer listing (Microcom485-BT by default) and select Properties.

-In the Hardware tab, make a note of the COM number next to Standard Serial over Bluetooth Link.

-Back in the Devices and Printers menu, right-click your Microcom Printer Driver listing and select Printer Properties.

-In the Ports tab, make sure the assigned COM port matches what was listed earlier in the Standard Serial over Bluetooth Link listing.

2C ETHERNET

PLUG IN ETHERNET CABLE

CONFIGURE NETWORK SETTINGS:

-From the home screen, select CONFIG MENU and then OPTIONAL PORTS. Make sure Ethernet is selected and tap Save. Reboot the printer if prompted.

-You can configure network parameters by selecting CONFIG MENU and then ETHERNET.

AFTER DOWNLOADING WINDOWS DRIVER (SEE 3A):

-Go to "Control Panel" then "Devices and Printers".

-Right-click your Microcom Printer Driver listing and select Printer Properties.

-In the Ports tab, select Add Port. Highlight Standard TCP/IP Port and click New Port.

-Follow the prompts to set up a network port using your printer's IP address and port number (you can check the IP/port in the PRINTER INFO menu).

-Back in the Ports menu of the Printing Preferences, select the new network port and click Apply.

2D WIFI

INSTALL Wi-Fi DONGLE IN HOST USB PORT

CONFIGURE NETWORK SETTINGS:

-From the home screen, select CONFIG MENU and then OPTIONAL PORTS. Make sure Wi-Fi is selected and tap Save. Reboot the printer if prompted.

-You can configure network parameters by selecting CONFIG MENU and then Wi-Fi.

AFTER DOWNLOADING WINDOWS DRIVER (SEE 3A):

-Go to "Control Panel" then "Devices and Printers"

-Right-click your Microcom Printer Driver listing and select Printer Properties.

-In the Ports tab, select Add Port. Highlight Standard TCP/IP Port and click New Port.

-Follow the prompts to set up a network port using your printer's IP address and port number (you can check the IP/port in the PRINTER INFO menu).

-Back in the Ports menu of the Printing Preferences, select the new network port and click Apply.

DIAGNOSTICS

TO VIEW PRINTER'S HARDWARE, USAGE, AND NETWORK INFO:

-Tap CONFIG MENU from the homescreen.

-Click NEXT to scroll through items until you reach PRINTER INFO.

-This process is the same for both FGL + IMAGE mode.
